- When one of the above district names is followed by -C (OI-C or MRC-1-C, for example), it indicates a conditional zoning with requirements elaborated in a specific ordinance passed by City Council.
- When one of the above district names is followed by SA (SPI-11 SA2 or LD-20A SA1, for example), it indicates a district sub-area which has requirements different than or in addition to those for the district as a whole.
- Floor area ratio is the number of square feet in a building divided by the square footage of the building lot. An FAR of 0.5, for example, represents a one-story building that covers half of the lot, a two-story building that covers one fourth of the lot, and so on. Maximum floor area ratio can be exceeded with bonuses in some districts.
